Health Information
EXCHANGE
electronic medical information sharing

Kansas Health Information Network (KHIN)

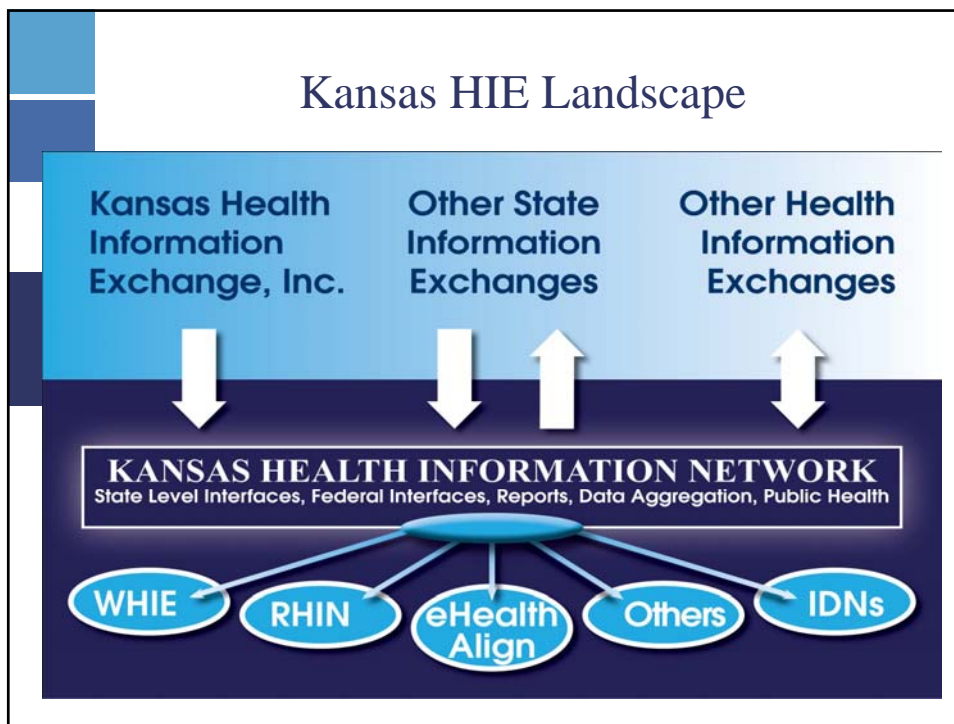

Mission:

To improve health care quality, coordination and efficiency through the exchange of health information at the point of care utilizing a secure electronic network provided by a collaboration of health care organizations.

Operating philosophy

- Ensure long-term sustainability of health information exchange.
 - Kansas non-profit organization-ensure high quality at lowest cost to providers
- Remove barriers to ensure that community exchanges can focus upon care coordination and local innovative strategies that improve patient outcomes.
- Develop trusting relationships

KHIN Community Toolkit

Now available on our Website

KHIN - July 2011

KHIN Community Toolkit

1. Set Up Structure
2. Identify Stakeholders
3. Complete Technical Form
4. Use REC Resources
5. Identify Early Adopters
6. Join KHIN
7. Determine Use Cases
8. Identify Data Needs
9. Set Up VPN
10. Test & Train
11. Live Exchange Use
12. Measure Effectiveness
13. Evaluation & Audit
14. Onboard Next Group

Set Up Structure

Set up the decision making organization or structure. This can be formal with the creation of a 501(c)(3) nonprofit organization, or less formal like a community council. Key members of the decision making structure are physician leaders, hospital leaders and other members of the community interested in health improvement initiatives. Identify a sponsor who can provide resources and space to hold meetings.

KHIN's Participating Providers

Kansas Health Information Network Participants (KHIN)

◆ Secure Messaging Provider (SMPP)

◆ 2-5 Secure Messaging Providers

★ eHealth Align - University of Kansas Hospital

★ Great Plains Health Alliance

★ WHE - Via Christi Hospital

○ Community Health Centers/ Safety Net Clinics

★ Rural Health Information Network Hospitals

● Rural Health Information Network Clinics

Legend: Toll Roads, US Highways, Interstate Highways, 100 KM, 100 Miles

4

Value for Providers

- Fair pricing
- Trusting relationship
- Reduce competition
- Meet provider attestation schedule
- Support local initiatives for HIE utilization
- Provide many products to meet provider needs
- Provide one connection that serves many purposes

KHIN Minimum Data Set

- Demographics
- Medications
- Allergies
- Problem List
- Lab Results
- Immunizations

KHIN Adoption Goal

By 2016 achieve state-wide use (75% of the Kansas population including at least 50% of rural areas) of interoperable health information exchange where 80% of healthcare providers (hospital systems/hospitals, physicians and other clinicians, community health centers, community mental health centers and public health departments) are meaningful users of health information technology and health information exchange.

Our technology partner: ICA

integrating care. **improving health.**

ICA offers a cost-effective, proven technology solution that leverages complete data across clinical settings to aid decision-making and improve patient outcomes

KHIN Suite of Products

- Portals—provider and patient
- Portal + e-prescribing
- Secure clinical messaging
- Direct
- EMR-Lite
- Full HIE functionality

Data Security

KHIN

User Type & Access

User Type	Level of Access
Site Administrator	Access to all data and to administer all functions
Auditor	Access to Audit Trail functionality
Security Override	Ability to activate Security Override (Break the Glass) functionality
Health Information Management	Ability to move and delete patient chart documents
Messaging Administrator	Ability to create and manage message baskets and user's access to those baskets
Patient Portal Administration (Optional Service)	Ability to administer patient portal users and their access to patient records
Patient Portal Registration (Optional Service)	Ability to create a patient portal user and to grant them access to patient records

Active Problems

Hypercholesterolemia
 Effective Dates: 04/15/2010
 Condition Status: Chronic
 Note: Currently on medication treatment and diet instructions.

Allergic Rhinitis
 Effective Dates: 01/10/2007
 Condition Status: Seasonal, Chronic
 Note: Patient stable with symptoms on current therapy of Allegra D 12 hr caps.

Hypertension
 Effective Dates: 01/10/2007
 Condition Status: Chronic
 Note: Current Treatment therapy effective. Patient monitoring BP at home.

Type 2 Diabetes
 Effective Dates: 01/10/2007
 Condition Status: Chronic
 Note: Patient doing well on current therapy. Glucose at home is running between 90 and 100 depending on his diet. No recent up urinary symptoms.

Resolved Problems

DERANG POST LAT MENISCUS
 Effective Dates: 03/03/1995 - 02/15/2009
 Condition Status: Resolved
 Note: Tom meniscus in right knee was surgically repaired by Roger Sutherland on 4/3/1995.

DERANG POST MED MENISCUS
 Effective Dates: DERANG POST MED MENISCUS
 Condition Status: Resolved
 Note: Tom meniscus in left knee was surgically repaired by Roger Sutherland on 5/15/1997.
